Leica DISTO™ D330i

Bluetooth

Thanks to BLUETOOTH®, measurement results can be accurately transferred to PCs. Thus you can easily process your data in Excel®, Word®, AutoCAD® and other programs.

Smart Horizontal Mode

Thanks to the combination of distance and tilt measurements you can determine the horizontal distance absolutely precise. At a touch of a button the indirect height can be also displayed.

Clear display

The results are displayed on the large (2"), clearly arranged and high contrast display. At the touch of a button, the display makes supplementary information available about the measurements.
